

HELLENiQ PETROLEUM

Date: 06/10/2025

Ref.: MSSW-UW-08072025

Dear Sir/Madam

Marex Subsea Welds Ltd sub-contracted to operate for and on behalf of Tiganopoulos Konstantinos LLC.

The scope for MSSW was to provide coded wet welding services **class A** in accordance with **AWS D3.6M code**, an American standard for underwater coded welding repairs in the Breasting Island of Helpe Thessaloniki Marine Terminal as part of the project strengthening of two piles with reinforcing plates due to corrosion and also repair of the crack in one pile.

Marex team arrived and started operations on Monday **22/09/2025** and finished Monday **30/09/2025**. Marex used its owned Welding team and Welding Procedure Specification to execute the work. The Job was completed on the 30th of September 2025.

MSSW completed the project successfully in accordance with our instructions and timeframe prescribed as well in a safe and efficient manner. Following the project completion, Marex engineering department sent the technical report and all necessary data and audio-visual material.

1

Throughout the duration of the project, Marex demonstrated exceptional professionalism and extensive expertise in both wet and dry welding operations. Marex Subsea Welds Ltd consistently showed strong cooperation, adaptability and commitment, delivering services of outstanding quality and reliability.

Based on this performance, Hellenic Petroleum would be pleased to consider engaging their services again for future projects.
